INDEX OF VOLUME 8

Addison, A. W. *A note on the compositeness of numbers*, 151.
Addison, J. W. and Kleene, S. C. *A note on function quantification*, 1002.
Adney, J. E. *On the power of a prime dividing the order of a group of automorphisms*, 627.
Akutowicz, E. J. *On the determination of the phase of a Fourier integral*, II, 234.
Albert, A. A. *A property of ordered rings*, 128.
Amitsur, S. A. *A generalization of Hilbert's Nullstellensatz*, 649.
Ankeny, N. C. *Sums of three squares*, 316.
Arsove, M. G. *Proper bases and automorphisms in the space of entire functions*, 264.
Auslander, M. *On regular group rings*, 658.
Barrett, J. H. *A Prüfer transformation for matrix differential equations*, 510.
Barrett, L. K. *On a question concerning partitioning raised by R. H. Bing*, 602.
Barsotti, I. *Noncountable normally locally finite division algebras*, 1101.
Beck, A. and Schwartz, J. T. *A vector-valued random ergodic theorem*, 1049.
Beesack, P. R. *A note on an integral inequality*, 875.
Bellman, R. *Eigenvalues and functional equations*, 68.
———, *Functional equations in the theory of dynamic programming*-VII, *A partial differential equation for the Fredholm resolvent*, 435.
———, *On monotone convergence to solutions of* $u' = g(u, t)$, 1007.
Bhonsle, B. R. *On a series of Rainville involving Legendre polynomials*, 10.
Blackman, J. *Convolutions with rational kernels*, 100.
Block, H. D. *A class of inequalities*, 844.
——— *Discrete analogues of certain integral inequalities*, 852.
——— *Discrete isoperimetric-type inequalities*, 860.
Brainerd, B. *On a class of lattice-ordered rings*, 673.
Brenner, J. L. *Bounds for determinants*. II, 532, 1160.
Bryant, S. J. and Zemmer, J. L. *A note on completely primary rings*, 140.
Büchi, J. R. and Wright, J. B. *Invariants of the anti-automorphisms of a group*, 1134.
Busemann, H. *Metrizations of projective spaces*, 387.
Butler, J. *On the normality of an analytic operator*, 733.
Cameron, R. H. *Differential equations involving a parametric function*, 834.
Carlitz, L. *Note on sums of four and six squares*, 120.
——— *A theorem of Dickson on nonvanishing cubic forms in a finite field*, 975.
Cesari, L. and Hale, J. K. *A new sufficient condition for periodic solutions of weakly nonlinear differential systems*, 757.
Chen, K. T. *On the composition functions of nilpotent Lie groups*, 1158.
Chern, S. S., Hirzebruch, F. and Serre, J.-P. *On the index of a fibered manifold*, 587.
Chihara, T. S. *On quasi-orthogonal polynomials*, 765.
——— *On co-recursive orthogonal polynomials*, 899.
Civin, P. and Yood, B. *Quasi-reflexive spaces*, 906.
Coddington, E. A. *Some Banach algebras*, 258.
Copeland, A. H., Jr. *On H-spaces with two nontrivial homotopy groups*, 184.
Crouch, R. B. and Scott, W. R. *Normal subgroups of monomial groups*, 931.
Curtis, M. L. and Fort, M. K., Jr. *Homotopy groups of one-dimensional spaces*, 577.
Davis, C. *A Schwarz inequality for convex operator functions*, 42.
Davis, M. *The definition of universal Turing machine*, 1125.
Day, M. M. *Every L-space is isomorphic to a strictly convex space*, 415.
De Santis, R. *A generalization of Helly's theorem*, 336.

Devinatz, A. *On infinitely differentiable positive definite functions*, 3.
Dieudonné, J. *On the Artin-Hasse exponential series*, 210.
——— *Denumerability conditions in locally convex vector spaces*, 367.
Diliberto, S. P. *A note on linear ordinary differential equations*, 462.
Divinsky, N. *Commutative subdirectly irreducible rings*. 642.
Dixmier, J. and Lister, W. G. *Derivations of nilpotent Lie algebras*, 155.
Donoghue, W. F., Jr. *Continuous functions spaces isometric to Hilbert space*, 1.
Douglas, J., Jr. *A uniqueness theorem for the solution of a Stefan problem*, 402.
——— *A note on the alternating direction implicit method for the numerical solution of heat flow problems*, 409.
Drăgilă, P. *Propriétés différentielles affines des réseaux*, 1127.
Drazin, M. P. *A generalization of polynomial identities in rings*, 352.
Dubins, L. E. *Conditional probability distributions in the wide sense*, 1088.
Duffin, R. J. *Two-dimensional Hilbert transforms*, 239.
——— *Representation of Fourier integrals as sums*. III, 272.
Dvoretzky, A. *Remark on my paper "On a theorem of J. L. Walsh,"* 982.
Edrei, A. and MacLane, G. R. *On the zeros of the derivatives of an entire function*, 702.
Edwards, D. A. *On absolutely convergent Dirichlet series*, 1067.
Elkins, T. A. *Orthogonal harmonic functions in space*, 500, 1160.
Ellis, R. *A note on the continuity of the inverse*, 372.
Ericksen, J. L. *On the Dirichlet problem for linear differential equations*, 521.
Fadell, E. *On spaces without isolated noncut point*, 362.
Fan, K., Glicksberg, I. and Hoffman, A. J. *Systems of inequalities involving convex functions*, 617.
Fort, M. K., Jr. See Curtis, M. L.
Foulis, L. *Subsets of an absolute retract*, 365.
Fox, C. *A composition theorem for general unitary transforms*, 880.
Friedman, A. *On n-metaharmonic functions and harmonic functions of infinite order*, 223.
——— *On classes of solutions of elliptic linear partial differential equations*, 418.
——— *On n-metacaloric functions*, 770.
Fuchs, W. H. J. *A theorem on power series whose coefficients have given signs*, 443.
Gaier, D. *Note on some gap theorems*, 24.
Gale, D. *Subalgebras of an algebra with a single generator are finitely generated*, 929.
Galler, B. A. *Cylindric and polyadic algebras*, 176.
Gerstenhaber, M. *On canonical constructions* IV, 745.
Gil de Lamadrid, J. and Jans, J. P. *Note on connectedness in topological rings*, 441.
Glicksberg, I. See Fan, K.
Goffman, C. *A lattice homomorphism of a lattice ordered group*, 547.
Goodman, A. W. *Univalent functions and nonanalytic curves*, 598.
Grove, V. G. *On closed convex surfaces*, 777.
Gunning, R. C. *Multipliers on complex homogeneous spaces*, 394.
Halberg, C. J. A., Jr. *The spectra of bounded linear operators on the sequence spaces*, 728.
Hale, J. K. See Cesari, L.
Halfar, E. *Compact mappings*, 828.
Halperin, I. and Luxemburg, W. A. J. *Reflexivity of the length function*, 496.
Hamilton, O. H. *Fixed points for certain noncontinuous transformations*, 750.
Harris, T. E. *Transient Markov chains with stationary measures*, 937.
Harrold, O. G., Jr. *Some consequences of the approximation theorem of Bing*, 204.
Hartman, P. *On Laurent operators on l_p*, 45.
Hartmanis, J. *A note on the lattice of geometries*, 560.

Hausner, A. *Ideals in a certain Banach algebra*, 246.
Heider, L. J. *A note concerning completely regular G_δ-spaces*, 1060.
Helfenstein, H. G. *An extremal problem concerning the centre of gravity of a convex disc*, 992.
Helson, H. and Quigley, F. *Maximal algebras of continuous functions*, 111.
——— *Existence of maximal ideals in algebras of continuous functions*, 115.
Henrici, P. *On the domain of regularity of generalized axially symmetric potentials*, 29.
Herstein, I. N. *Jordan derivations of prime rings*, 1104.
Herz, C. S. *A note on the span of translations in L^p*, 724.
Hewitt, E. and Wigner, E. P. *On a theorem of Magnus*, 740.
Hewitt, E. and Williamson, J. H. *Note on absolutely convergent Dirichlet series*, 863.
Hirschman, I. I., Jr. *Projections associated with Jacobi polynomials*, 286.
Hirzebruch, F. See Chern, S. S. and Serre, J.-P.
Hochstadt, H. *A relationship between parabolic and spherical functions*, 489.
Hoffman, A. J. See Fan, K.
Holladay, J. C. *A note on the Stone-Weierstrass theorem for quaternions*, 656.
——— *On the existence of a mixing measure*, 887.
Hughes, D. R. *Regular collineation groups*, 165.
——— *A note on some partially transitive projective planes*, 978.
Hummel, J. A. *Counterexamples to the Poincaré inequality*, 207.
——— *Complete orthonormal sequences of functions uniformly small on a subset*, 492.
Isbell, J. R. *On a theorem of Richardson*, 928.
Jacob, H. G. *Coherence invariant mappings of symmetric transformations*, 943.
Jakimovski, A. *Some Tauberian properties of Hölder transformations. Addendum*, 487.
James, I. M. *Multiplication on spheres* (I), 192.
——— *Note on cup-products*, 374.
Jans, J. P. See Gil de Lamadrid, J.
Karrass, A. and Solitar, D. *Note on a theorem of Schreier*, 696.
Kato, T. *On the Hilbert matrix*, 73.
Kelly, P. J. and Straus, E. G. *Inversive and conformal convexity*, 572.
Kendall, D. G. *A note on Doeblin's central limit theorem*, 1037.
Kleene, S. C. See Addison, J. W.
Kleinecke, D. C. *On operator commutators*, 535.
Kleinfeld, E. *Assosymmetric rings*, 983.
Koch, R. J. *On monothetic semigroups*, 397.
Koosis, P. *Approximation of certain functions by exponentials on a half line*, 428.
——— *An irreducible unitary representation of a compact group is finite dimensional*, 712.
Kozin, F. *A limit theorem for processes with stationary independent increments*, 960.
Krabbe, G. L. *On the spectra of certain Laurent matrices*, 894.
Kulik, S. *On the Laguerre method for separating the roots of algebraic equations*, 841.
Lakshmana Rao, S. K. See Venkatachaliengar, K.
Lakshmikanth, V. *On the boundedness of solutions of nonlinear differential equations*, 1044.
Leavitt, W. G. *Modules without invariant basis*, 322.
Leger, G. F., Jr. *On cohomology of Lie algebras*, 1010.
Lister, W. G. See Dixmier, J.
Livesay, G. R. *Concerning real valued maps of the n-sphere*, 989.
Long, R. G. *A T-system which is not a Bernstein system*, 925.
Lorch, L. *The Gibbs phenomenon for Borel means*, 81.

Lowdenslager, D. B. *On postulates for general quantum mechanics*, 88.
——— *Duality in vector lattices*, 476.
Luxemburg, W. A. J. See Halperin, I.
MacLane, G. R. *Continuity properties of derivatives of sequences of functions*, 897.
——— See Edrei, A.
Mahler, K. *A matrix representation of the primitive residue classes* (mod $2n$), 525.
Martin, A. V. *A note on derivatives and neighborly functions*, 465.
Maxwell, C. N. *Fixed points of symmetric product mappings*, 808.
McAuley, L. F. *A note on naturally ordered sets in semi-metric spaces*, 384.
McCoy, N. H. *A note on finite unions of ideals and subgroups*, 633.
McCrossen, G. *A generalized Laplace-Stieltjes transformation*, 278.
McKiernan, M. A. *The functional differential equation* $Df=1/f$, 230.
Meng, C. H. *A condition that a normal operator have a closed numerical range*, 85.
Merriell, D. M. *Flexible almost alternative algebras*, 146.
Michael, E. *Another note on paracompact spaces*, 822.
Milkman, J. *Logarithmic sequences*, 1114.
Mizel, V. J. *A boundary layer problem for an elliptic equation in the neighborhood of a singular point*, 62.
Mohanty, R. *Evaluation of a trigonometric integral*, 107.
Nehari, Z. and Netanyahu, E. *On the coefficients of meromorphic Schlicht functions*, 15.
——— *On the coefficients of univalent functions*, 291.
Netanyahu, E. See Nehari, Z.
Newman, M. *An inclusion theorem for modular groups*, 125.
Niven, I. and Warren, L. J. *A generalization of Fermat's theorem*, 306.
Numakura, K. *Theorems on compact totally disconnected semigroups and lattices*, 623.
O'Neill, B. and Straus, E. G. *A fixed point theorem*, 1148.
Osserman, R. *On the solution of* $f(f(z))=e^z-1$ *and its domain of regularity*, 262.
Palais, R. S. *On the differentiability of isometries*, 805.
Pan, T. K. *Indicatric torsion in a subspace of a Riemannian space*, 294.
——— *Surfaces in a conformal correspondence*, 563.
Parameswaran, M. R. *On the constants associated with a reversible summability matrix*, 341.
——— *On some Mercerian theorems in summability*, 968.
Parker, E. T. *On collineations of symmetric designs*, 350.
Perel, W. M. *Principal representations in commutative semigroups*, 957.
Pettis, B. J. *Comments on open homomorphisms*, 583.
——— *On a vector space construction by Hausdorff*, 611.
Phelps, R. R. *Convex sets and nearest points*, 790.
Pitt, H. R. *An elementary proof of the closure in L of translations of* e^{-x^2}, *and the Borel Tauberian theorem*, 706.
Posner, E. C. *Derivations in prime rings*, 1093.
Preston, G. B. *A note on representations of inverse semigroups*, 1144.
Pursell, L. E. *The rings* $C(X, R)$ *considered as a subring of the ring of all real-valued functions*, 820.
Putnam, C. R. *On square roots of normal operators*, 768.
Quigley, F. *Approximation by the translates of a single function*, 1021.
——— See Helson, H.
Raimi, R. A. *Mean values and Banach limits*, 1029.
Redheffer, R. M. *On pairs of harmonic functions*, 450.

——— *A Sturmian theorem for partial differential equations*, 458.
Reid, W. T. *Remarks on a matrix transformation for linear differential equations*, 708.
Reiner, I. *Integral representations of cyclic groups of prime order*, 142.
——— *A theorem on continued fractions*, 1111.
Rice, H. G. *On the relative density of sets of integers*, 320.
Rinehart, R. F. *Extension of the derivative concept for functions of matrices*, 329.
Roberts, J. B. *Matrix summability in F-fields*, 541.
Robinson, A. *Errata to "Solution of a problem by Erdös-Gillman-Henriksen"* on p. 908 of vol. 7, 1160.
Robison, G. B. and Wolk, E. S. *The imbedding operators on a partially ordered set*, 551.
Rogers, H., Jr. *A note on the law of large numbers*, 518.
Rooney, P. G. *A property of the Laplace transformation*, 883.
Rudin, M. E. *A property of indecomposable connected sets*, 1152.
Rudin, W. *Continuous functions on compact spaces without perfect subsets*, 39.
Sanderson, D. E. *Isotopy in 3-manifolds* I. *Isotopic deformations of 2-cells and 3-cells*, 912.
Saworotnow, P. P. *On a generalization of the notion of H*-algebra*, 49.
——— *On the imbedding of a right complemented algebra into Ambrose's H*-algebra*, 56.
Schenkman, E. *A characterization of some metacyclic groups*, 664.
Schreiber, M. *Compactness of the structure space of a ring*, 684.
Schwartz, J. T. See Beck, A.
Scott, W. R. *On the multiplicative group of a division ring*, 303.
——— *Half-homomorphisms of groups*, 1141.
——— See Crouch, R. B.
Segal, I. E. *The structure of a class of representations of the unitary group on a Hilbert space*, 197.
Seligman, G. B. *Characteristic ideals and the structure of Lie algebras*, 159.
Serre, J.-P. See Chern, S. S. and Hirzebruch, F.
Shoenfield, J. R. *Quasicreative sets*, 964.
Simmons, H. A. *Classes of maximum numbers associated with two symmetric equations in N reciprocals*, 169.
Sinclair, A. *Pseudolocally compact spaces*, 215.
Smale, S. *A note on open maps*, 391.
——— *A Vietoris mapping theorem for homotopy*, 604.
Smiley, M. F. *Jordan homomorphisms and right alternative rings*, 668.
Smith, R. C. T. *Bounded groups of transformations*, 831.
Solitar, D. See Karrass, A.
